

TecLines TAS001/TAS002/TAS003 Corner socket strip kitchen with cable

Description

The TecLines corner socket TAS001/TAS002/TAS003 with a 1.8 metre power cable is the perfect corner socket strip for the kitchen, office or home office or wherever several devices are to be connected simultaneously. The kitchen socket outlet is equipped with either three (TAS001) or four (TAS002) earthed sockets or with two sockets and two USB connections type A (TAS003) and can be placed either horizontally or vertically in a corner or edge to save space. The multiple socket outlet is available in the colour silver/anthracite (all) or optionally completely in white (TAS001/TAS003).

This means that the kitchen socket strip takes up very little space on the worktop, kitchen counter or desk and leaves valuable work space free. The multiple socket outlet can simply be set up or laid down or alternatively screwed into the desired corner or onto the edge. The screws and dowels required for this are already included in the scope of delivery.

Key features

TAS001:	3x socket outlet with earthing contact (230V AC, max. 16A)
