

## TecLines TES009/TES010/TES011/TES012 built-in power strip with cable

### Description

The TecLines built-in power strip desk with a power cable is the perfect recessed socket outlet for the office or home office or the kitchen. The retractable socket outlet is equipped with three earthed sockets (TES011, TES012) or with two earthed sockets and two USB-A connections (TES009, TES010) and is simply opened or retracted into the worktop or desk at the touch of a finger. This way, the desk connector panel disappears from view when not in use and merges into a flat unit with the desk surface.

The retractable desk connector panel is available in the colours silver, black or white and is optionally equipped with a 1.5 m or 3 m long cable with an angle plug with earthing contact. A table cut-out of 220 x 109 x 65 mm (LxWxD) is required for installation.
