

## TecLines TKM010W

### Keystone Module 3.5 mm jack female/female

## Description

The TecLines TKM010W is a keystone audio adapter with a 3.5 mm stereo jack socket on both sides of the module. This compact, standardised snap-in module can be easily integrated into keystone panels or junction boxes. The keystone module has a jack socket on both sides so that the cables can be plugged in directly. The keystone module audio jack/socket adapter is also suitable for extending two cables. In many of the multiple sockets that can be mounted in / on the desk or wall there are empty fields. It can be inserted in these empty fields / support frames can be simply attached with a screwdriver and assembled individually according to requirements. TecLines offers a wide selection of custom module components for video, audio and network connections for socket outlets and connector panels. VGA, HDMI, USB or RJ45 connections are easily fixed / integrated into multiple socket strips in empty fields or carrier frames. The dimensions of the Keystone modules all follow a standard.
